Cognitive Behavioral Therapy is a research-based treatment approach to mood disturbances and behavior problems. This form of psychotherapy helps identify the relationship between thoughts, feelings, and behaviors, and their impact on life situations. Instructor will lead a lecture and discussion on Cognitive Behavioral Therapy and how to apply the skills and tools. Please join us for a monthly one hour education group to learn more about cognitive therapy and how it can help you treat depression, anxiety, bipolar disorder, panic disorder, phobias, anxiety, anger, relationship problems, grief and loss and most other difficulties that bring people to therapy.
