

RESEARCH SUBJECTS NEEDED FOR EYEBLINK STUDY

Dr. William Perry and his associates at UCSD are conducting a research study on how the brain controls our behavior.

We are seeking adults 18-60 with normal hearing who have a history of Bipolar Disorder and/or Major Depressive Disorder.

You must have no serious medical or neurological conditions, including seizures and significant head trauma.

Study Procedures

- Eyeblick test where electrodes are placed near the eyes and sounds are played through headphones
- Wear a chest strap that measures the movements of your body
- Computer as well as paper and pencil problem-solving tests
- Participants reimbursed at \$10 per hour
- Between 1 to 5 hours of testing
